DETAILED ACTION

Response to Amendment

1. In response to the previous examiner's Office Action, mailed 4/13/2007, applicant has submitted an Amendment, filed 7/12/2007, amending claims 2, 10, 13-14, 22, and 31-32 without adding new matter, and arguing to traverse the claim rejections.

Response to Arguments

2. Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.

Information Disclosure Statement

3. The two information disclosure statements (IDS) submitted on 7/12/2007 are in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statements have been considered by the examiner. Please note that previously considered references, as well as one duplicated such reference (Fogarty), have been lined out, since they have not been reconsidered for this Office Action.

Claim Rejections - 35 USC § 101

4. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Art Unit: 2626

5. Claims 1-4, 15-19, 22-28, 31-32, 34-39 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Independent claim 1 is rejected because it has no recited input nor output capability for the apparatus, and thus involves only internal processing of data involving two computers, without transforming an article or physical object to a different state or thing, nor producing a result which has a real-world practical application/use.

Dependent claims 2-4, 34, and 38-39 are rejected because they do not cure the deficiency of claim 1.

Independent claim 15 is rejected because it claims "computer-readable media", which, according to the Specification (p. 9, line 21), includes a nonstatutory "modulated carrier signal", and does not recite that the "program" is a "computer program".

Dependent claims 16-19, 22-23, and 36 are rejected because they do not cure this deficiency.

Independent claim 24 is also rejected because it claims a nonstatutory "modulated carrier signal".

Dependent claims 25-28, 31-32, 37 are rejected because they do not cure this deficiency.

Allowable Subject Matter

6. Claims 6-10, 13-14, and 34 are allowed over the prior art of record.
